

Finally a roof system that retracts, allowing you to double the use of outdoor living spaces, restaurant forecourts, pubs or clubs. Retracted in fine weather to let in sunshine and warmth, RENO can be closed with the push of a button for protection against wind and rain .

Retractable Roofs

An extremely important part of any patio is the folding fabric of the roof. All our patio models come with wide range of blockout or translucent rain-resistant fabrics. Our fabrics meet the highest quality standards. They comes fitted with a anti-drip system, the correct angle makes this suspension ideal for optimal water drainage.

Width (cm) : 1100 cm
Projection (cm) : Maximum 600 cm
Operation : Remote Controlled
Optional lighting system available

**100%
WATER
PROOF**

Innovative Operating System

The cassette which protects the motor housing is made from aluminium extrusion profiles. You can adjust the power for effortless operation no matter how large the folding roof is. It ensures the fabric is pulled smoothly taut, even with fluctuations in temperature. This motor is made by the European manufacturer and easy to operate via a remote control or with a connection to a home automation system.

**One -Touch
Remote
Operation**
